“Health Department of Nalaikh district”

General information

2019.03.21

- ❧ Health Center of Nalaikh District has 366 employees and has been operating the Global fund supported projects since 2003.
- ❧ According to the Health Minister Resolution №145, all local private sector workers are encouraged to receive medical services and supervision from the local Health Department, which help us to serve foreigners.
- ❧ In 2017, four times for more than 400 people were screened and 8 new cases of tuberculosis were detected.
- ❧ In 2018, two times 1600 people screened and 19 were treated.
- ❧ We are planning to move to a new TB Department in September 2019.

STI cabinet and VCT center

Condition

Obstacles

- ❧ The STI cabinet has a doctor, a social worker and 2 nurses. Early detection is well organized. Cooperates closely with governmental and non-governmental organizations. The regular inspection takes place in the police station, hotel and tourist campuses.
- ❧ A new HIV case detected in Terelj.

- ❧ Health workers are insufficient.
- ❧ Infectious diseases are more common among Mongolians than foreigners.

STI cabinet

TB dispensary of the General Hospital

Condition

- ❧ Tuberculosis dispensary ventilation system of US \$ 35,000 funded by the GF.
- ❧ The report has been sent by TUBIS program semi-annually. The Nalaikh's registrar enters with her own code, therefore, personal privacy is secured. In 2018, 54 patients had recovered in 84 days in the hospital, .
- ❧ We seek to diagnose and detect suspects separately. Healthy people are screened in separate rooms for screening and testing.

Obstacles

- ❧ Physicians are insufficient.
- ❧ Due to the lack of diagnostic equipment, sending a sample to the NCCD is time-wasting.
- ❧ Sometimes, we borrow a portable X-ray apparatus from the UB Health Department in order to do the screening.
- ❧ It is difficult to reach distant living patients.
- ❧ There are problems with the treatment of homeless people.
- ❧ Doctors need financial support and assistance in managing a variety of activities.

A donation box was created to support TB patients..

“Perfect Ladies” NGO

Conditions

Obstacles

- Result of the advocacy meetings among administrative, decision makers, and law enforcement agencies and policeman, the cooperation between government and non-government organizations were improved and received positive information about sex workers, and collaborating on HTC.
- The cooperation with the organization working against violence have improved, counseling and protecting services can be provided to FSWs affected on violence.
- The number of reached FSWs were increased due to the result of the advocacy meetings with pimps and owners of the bar, sauna massage.

- Recently beginning of 2018, the general police department is regularly organizing namely "Sauna Massage" event, to prevent and combat crimes against others.
- The bars, saunas, and massage centers are closed and FSWs have changed their location. Due to this, to reach the FSWs community is getting more difficult.
- The number of sex work using social media to find clients was increased, under the advertisement namely, need financial support.
- There is more risk of violence among sex workers.

CCM suggestions

- ☞ Promote your activities to the public.
- ☞ There should be a good understanding of the projects' partnership (Ministry of Health, PCU, CCM and other partners)
- ☞ Cooperation is the key to understand and support each other.

“New Positive Life” NGO

Conditions

Achievement

- ❧ The organization serves for 80-90 people with HIV and their relatives 800-900 people. Aim to work with newly appointed medical practitioners to cooperate with the public for the sake of non-discrimination and protection. The HIV registered in UB, Darkhan and 429th prison.
 - ❧ Cooperates with Youth Health NGO. People who have been attended the training of Youth Health had a common understanding of our activities.
 - ❧ In addition, our publications have been updated with real-time stories on our facebook. Training manuals, textbooks and advertisement pages are published and used.
 - ❧ Within the framework of the project, we visited 21 aimags of Mongolia and lectured each of them.
 - ❧ 9 of the registered persons are currently living in foreign countries.
- ❧ Focusing on the target group is very intense.
 - ❧ In 2018, 8 new cases of HIV were receiving social benefit from the State.
 - ❧ Medications were given to 3 patients with MDR-TB.
 - ❧ Organized meetings with 8 people. PLWDs are more likely to participate with their friends.
 - ❧ Implementing our program in the 429th prison.

“New Positive Life” NGO

Obstacles

- ❧ No professional psychologist.
- ❧ Due to the misunderstanding of society, our communities are closed and feel a burden. It is also hard to change the social psychology.

❧ Suggestion

Psychologist required in order to enable a friendly environment for PLWD.

Suggestions

- ❧ Society need to be informed right information at the right time.
- ❧ In the future, the public-private partnership should be improved and cooperate with the State owned orgs.
- ❧ If you announce the teachers' name and picture with meeting's title and information. That can maximize the participation of meetings

Thank you for your
consideration.
